NexaWorks

A dependable delivery partner

Response to RFP-2026-017: Supplier Portal and Contract Lifecycle Management Platform
Issued by Meridian Foods Ltd. (fictional)

Requirement summary. Meridian Foods Ltd. requires a cloud-based Supplier Portal and Contract Lifecycle Management (CLM) platform for about 2,500 internal users and 1,200 external suppliers. Mandatory needs: integration with the SAP S/4HANA ERP and corporate single sign-on, workflow-based contract approvals, auditability, data protection aligned with ISO 27001, go-live within 6 months and 3 years of support.

1. Executive Summary and Understanding of the Requirement

NexaWorks proposes a configurable CLM and supplier-portal platform delivered through a structured, low-risk programme. We understand that Meridian Foods needs reliable integration with SAP S/4HANA and SSO, a smooth transition for 2,500 users and strong support after go-live. Our proposal balances capability, security, cost and delivery certainty.

2. Proposed Solution and Implementation Approach

Architecture: a modular cloud application with a configurable workflow engine and a managed relational database; it scales to 5,000 users on the proposed sizing.

Integrations: SAP S/4HANA is integrated through standard OData services with a pre-built vendor-master and purchase-order mapping; SSO uses SAML 2.0. Integration design is signed off in week 3 and tested in a sandbox before production.

Our delivery method has six gated phases (mobilise, design, build, integrate, test and train, go-live) with a formal acceptance criterion at the end of each phase.

3. Timeline, Team Structure and Milestones

Total duration is 20 weeks from contract signature, with a pilot with 50 users in week 15.

- Week 2: project charter, RACI and communication plan approved
- Week 3: integration design sign-off
- Week 8: build complete for core workflows (milestone payment 1)
- Week 12: SAP sandbox integration passed
- Week 15: pilot go-live with 50 users
- Week 18: UAT and training of 40 key users and train-the-trainer sessions complete
- Week 20: production go-live; 6 weeks of hypercare

Staffing: 14 named roles including a dedicated project manager, change manager, solution architect, 3 developers, 2 integration engineers, 2 testers and a security officer. A risk register with owners and weekly review is maintained; typical top risks include SAP data quality, user adoption and key-person availability, each with a named mitigation.

4. Commercial Proposal

All prices are in USD, fixed price, with milestone-based payments (20% at signature, 30% at week 8, 30% at pilot go-live, 20% at production acceptance).

Item	Amount (USD)
Platform licence (3 years)	150,000
Implementation and SAP integration	145,000
Training and change management	25,000
Support, years 1-3 (gold tier)	40,000
Total three-year cost	**360,000**

Assumptions: up to 2,500 internal users and 1,200 suppliers; one SAP S/4HANA instance; two environments (test and production); change requests at 900 USD per day; prices valid for 120 days.

5. Security, Compliance and Risk Controls

NexaWorks is ISO 27001 certified and holds a SOC 2 Type I report; the Type II audit is scheduled for next year. Data is encrypted at rest and in transit, access is role-based with MFA, and audit logs are retained for 3 years. Penetration tests are run annually. A data processing agreement is provided.

6. Support Model, Experience and References

24x7 support with three tiers. P1 incidents get a 30-minute response and a 4-hour target resolution; P2 incidents a 2-hour response. Each customer has a named customer success manager, quarterly service reviews and a monthly service report.

NexaWorks has delivered five comparable programmes in the last five years. References: Orchard Beverages (fictional), Procurement Director; Lumen Pharma (fictional), IT Director; Tidewater Logistics (fictional), Head of Supply Chain.
